Projects

Imkan Real Estate (Salesforce Sales & Service clouds) Implemented and customized Salesforce Sales Cloud to streamline lead management, opportunity tracking, and sales forecasting. Designed and deployed Service Cloud workflows to enhance case management, automate customer support processes, and improve SLA compliance. Built and optimized Lightning Record Pages and custom objects to align with business requirements and improve user experience. Integrated Salesforce with external systems (e.g., ERP, marketing tools) to ensure seamless data flow and reporting accuracy. Created dashboards and reports for sales and service teams, enabling data-driven decision-making and performance monitoring. Supported user training and adoption by preparing documentation, conducting workshops, and resolving deployment issues. My 3D Portfolio Website (Three.js) ↗ Used React & three.js & three-fiber 3D UI JavaScript libraries Used framer-motion for advanced CSS animations
